Scoring:

Add 3 points for each "a" that you circled, 2 for each "b", and 1 for each "c". If you scored 20 or over, a distance learning course is a real possibility for you. If you scored between 11 and 20, distance learning courses may work for you, but you may need to make a few adjustments in your schedule and study habits to succeed. If you scored 10 or less, distance learning may not currently be the best alternative for you; talk to your counselor.

Explanations:

1. Distance Learning students sometimes neglect their courses because of personal or professional circumstances. Having a compelling reason for taking the course helps motivate the student to stick with the course.
2. Some students prefer the independence of Distance Learning; others find the independence uncomfortable and miss being part of the classroom experience.
3. Distance Learning courses give students greater freedom of scheduling, but they can require more self-discipline than on-campus courses.
4. Some people learn best by interacting with other students and instructors. Others learn better by listening, reading and reviewing on their own.
Some Distance Learning courses provide less opportunity for group interaction than most on-campus courses.
5. Distance learning requires you to work from written directions.
6. It may take as long as two to three days to get comments back from your instructor in Distance Learning classes.
7. Distance Learning requires at least as much time as on-campus courses. Students surveyed say that Distance Learning courses are as hard or harder than on campus courses.
8. Most people who are successful with Distance Learning find it difficult to come to campus on a regular basis because of their work/family/personal schedules.
9. Print materials are the primary source of directions and information in Distance Learning courses.
10. Students who do well in Distance Learning courses are usually comfortable contacting the instructor as soon as they need help with the course.
